

SYED MUSTAFA ALI

System Engineer | DevOps Engineer | Cloud & Automation Enthusiast

+91 7995370881 · alisyedmustafa28@gmail.com · linkedin.com/in/mustafa28 · github.com/musz2 · Hyderabad, India

PROFESSIONAL SUMMARY

Results-driven DevOps and Cloud professional with hands-on experience designing and managing scalable cloud infrastructure, CI/CD pipelines, and containerized deployments on AWS and Azure. Proficient in infrastructure automation using Terraform and Ansible, container orchestration with Docker and Kubernetes, and building AI-powered applications including RAG systems using LangChain. Passionate about cloud-native architectures, operational efficiency, and delivering production-grade solutions. Adept at working in fast-paced environments with cross-functional teams to drive DevOps culture and digital transformation.

CORE TECHNICAL SKILLS

Cloud Platforms	AWS (EC2, EKS, S3, RDS, IAM, CloudWatch, ECR), Microsoft Azure
DevOps Tools	Jenkins, GitHub Actions, ArgoCD, GitLab CI, Helm
Containerization & Orch.	Docker, Kubernetes, Docker Compose, Container Registry
Infrastructure as Code	Terraform, Ansible, AWS CloudFormation
Version Control	Git, GitHub, GitLab, Bitbucket
Scripting & Programming	Python, Bash/Shell Scripting
Operating Systems	Linux (RHEL, Ubuntu, CentOS), Windows Server
Monitoring & Logging	Prometheus, Grafana, ELK Stack (Elasticsearch, Logstash, Kibana), Datadog

PROFESSIONAL EXPERIENCE

System Engineer

The Career Insights | Hyderabad, India | May 2026 – Present

- Manage and maintain cloud and on-premises infrastructure ensuring high availability, performance, and security of business-critical applications.
- Design, implement, and optimize CI/CD pipelines using Jenkins, GitHub Actions, and ArgoCD to accelerate software delivery cycles.
- Deploy and manage containerized applications using Docker and Kubernetes, ensuring scalability and operational reliability.
- Monitor system health and application performance using Prometheus, Grafana, and ELK Stack; implement proactive alerting.
- Automate infrastructure provisioning and configuration management using Terraform and Ansible, reducing manual effort significantly.
- Collaborate with development and business teams to drive DevOps practices, workflow automation, and cloud-native transformation.

Associate Engineer

Wipro | Hyderabad, India | September 2024 – May 2026

- Maintained Linux-based systems and enterprise applications, ensuring smooth and uninterrupted business operations.
- Supported cloud and infrastructure environments by monitoring system performance, troubleshooting issues, and applying corrective fixes.

- Assisted in application deployments, system validations, and service availability maintenance across production environments.
- Leveraged automation scripts and DevOps tools to streamline operational tasks and improve deployment efficiency.
- Participated in incident management, root cause analysis, and operational documentation to ensure reliable and secure IT operations.

KEY PROJECTS

AI PDF RAG Chatbot

Built an AI-powered chatbot using OpenAI embeddings, FAISS vector store, and Retrieval-Augmented Generation (RAG) to enable intelligent Q&A; over uploaded PDF documents. Containerized with Docker for portable deployment.

Technologies: Python, LangChain, OpenAI API, FAISS, Docker, FastAPI

DevOpsGPT — AI DevOps Assistant

Developed an AI-powered DevOps assistant capable of troubleshooting infrastructure issues, providing cloud architecture recommendations, and automating operational workflows using natural language prompts.

Technologies: Python, OpenAI API, Kubernetes, Terraform, CLI

Jenkins + Docker + Kubernetes CI/CD Pipeline

Designed and implemented a fully automated CI/CD pipeline for building, testing, containerizing, and deploying applications to Kubernetes with zero-downtime rolling deployments and automated rollback.

Technologies: Jenkins, Docker, Kubernetes, AWS ECR, Helm, GitOps

Cloud Infrastructure Automation with Terraform

Provisioned complete AWS infrastructure including VPC, EKS cluster, RDS, IAM roles, S3, and CloudWatch monitoring using Infrastructure as Code principles, enabling repeatable and version-controlled deployments.

Technologies: Terraform, AWS (EKS, RDS, IAM, S3), Ansible, CloudWatch

Dockerized Three-Tier Application Deployment

Containerized and deployed a scalable three-tier web application (frontend, backend API, PostgreSQL database) using Docker Compose for local development and Kubernetes with Helm charts for production.

Technologies: Docker, Kubernetes, Nginx, PostgreSQL, Node.js, Helm

CERTIFICATIONS

- AWS Certified Cloud Practitioner (CLF-C02)
- Linux Administration Certification

EDUCATION

Bachelor of Technology — Information Technology

Shadan College of Engineering & Technology, Hyderabad, India | Graduation: 2024 | CGPA: 6.43/10
